

Easy to Use

Detergent Sanitizer

This product is suitable for:

- All surface disinfection requiring 1,000ppm or 10,000ppm available chlorine.
- Cleaning and disinfecting in one step.
- Killing a wide range of pathogens and is BS EN 1276, 13697 and 13704 compliant.
- Spillages of bodily fluids.
- Terminal cleans of vacated rooms.
- Cleaning barrier-nursed rooms.

HOW TO USE:

For a 1,000ppm chlorine solution mix 25g of powder with 1 litre of warm water.

For a 10,000ppm chlorine solution mix 125g of powder with 500ml of warm water.

Wash surfaces, leave for at least 15 minutes (1,000ppm) or 2 minutes (10,000ppm) respectively, rinse and leave to air dry.

To use neat: pour powder onto spillage, remove excess soil, wash area thoroughly, rinse and wipe dry. Do NOT use direct on urine spills, these must be mopped up first via paper towels or appropriate absorber.
